

# DataCell

## GPS

Data recording and tracking.

Applications:

- Position monitoring

Features:

- Waterproof to 1 metre
- SMS and e-mail reporting
- Stores 2 Million Records
- GPS enabled for easy tracking
- 3 year battery life\*

## Product Overview

Upon activation of a switch, the Aegis DataCell will transmit a GPS location to preprogrammed SMS and e-mail addresses via GSM/GPRS. The GPS location information is reported as latitude and longitude readings which can be imported into applications such as GOOGLE Maps™ to graphically show the position of the plant that the GPS unit is attached to.

The DataCell GPS unit has numerous applications including:

- Tracking of water trucks as they fill their tanks at standpipes etc.
- Asset tracking of large pieces of hire equipment
- Tracking of motor yachts, sailing yachts etc.
- Tracking of bulk cargo shipments during delivery

In fact any application which requires accurate position information of equipment or could benefit from being fitted with a DataCell GPS unit.

## Specifications

### Communications

Serial:	Infrared interface
Wireless:	GSM/GPRS modem File Transfer Protocol (FTP)

### Logging

Memory	2 million records
Clock	Real time with time and date stamp Remote SNTP time update
GPS	GPS enabled for transmitting coordinates, latitude and longitude
*Battery life	Typically 3 years at one call per day

### Physical

Dimensions	88mmØ x 170mm
Weight	470 grams
Environmental	IP68
Operating Temperature	-20°C to +75°C for all logger functions -20°C to +55°C for GSM functions

<b>Part Number</b>	CZ21044
--------------------	---------
